

A novel current-mode OTA-C universal filter Vol. 2, 2007, pp. 279-284

Abuelma'atti, M.T. and Bentrchia, A. (2007) *A novel current-mode OTA-C universal filter Vol. 2, 2007, pp. 279-284*. Active and Passive Electronic Devices, 2 . pp. 279-284.

Abstract

A novel current-mode biquad circuit is presented. The circuit uses two single-output-, one multiple-output-operational transconductance amplifiers (OTAs), two grounded capacitors and can realize lowpass, highpass, bandpass, notch, lowpass notch, highpass notch and allpass responses from the same topology. The parameters ω_0 and ω_0/Q_0 enjoy independent electronic tunability. Simulation results are included
